DURAPLATE

DURAPLATE is photoluminescent, multilayer material specially designed for the production of luminous signage and LLL system.

DURAPLATE is manufactured on the basis of a semi-rigid and self-extinguishing PVC which protects the luminous layer against mechanical damages and UV rays. It is equipped with a soft, self-adhesive foam which guarantees a strong bond to a wide variety of surfaces.

All components are non-toxic and non-radioactive. The material is MED-approved and classified as flame retardant according to IEC 60092-101:2001 regulation.

Features

Made of materials with an enhanced fire resistance

High afterglow performance

Non-toxic and non-radioactive

Temperature resistance from -30°C to +65°C

Excellent adhesive properties

Suitable for external use

Protective foil removable after installation

Printed area secured with a transparent plastic

Does not require any special maintenance

Afterglow performance

| Regulation | Brightness (mcd/m ²) | | | Decay time |
|----------------|----------------------------------|--------|---------|--------------|
| | 10 min | 60 min | 120 min | |
| DIN 67510-I | ≥ 120 | ≥ 16 | ≥ 7 | min. 852 min |
| ISO 15370:2010 | ≥ 28 | ≥ 8 | - | - |

Certificates

DURAPLATE material is certified by DNV-GL for compliance with (EU) 2017/306, item No. MED/3.40. SOLAS 74 as amended, Regulation II-2/13, FSS Code II, IMO Res.A.752(18) and ISO 15370:2010.

Tests

DURAPLATE material was tested in accredited laboratories and it meets or exceeds the following requirements:

- ISO 15370:2010 Ch. 4.2 and Annex A - Phosphorescence test
- DIN 67510-I - Photopic Luminance test
- IEC 60092-101:2001 part 2.28.2 - Flame retardance test
